

Industrial Network Card Signal Recover Rapidly

Built-in industrial-grade 5G network card, signal recovers rapidly and reconnects automatically. (Downward compatible with 4G)

Industrial

General

5G

Network Type

200_{ms}

Delay

1080p

Video Input

293g

Net Weight

2

Ethernet input

5V

Working Voltage

5G Communication, No Distance Limitation

Powerful Tool for Remote Command Center

— Support flight data and video sharing, support multiple clients to watch real-time video&data and even control, it's a powerful tool for remote command / control centers.

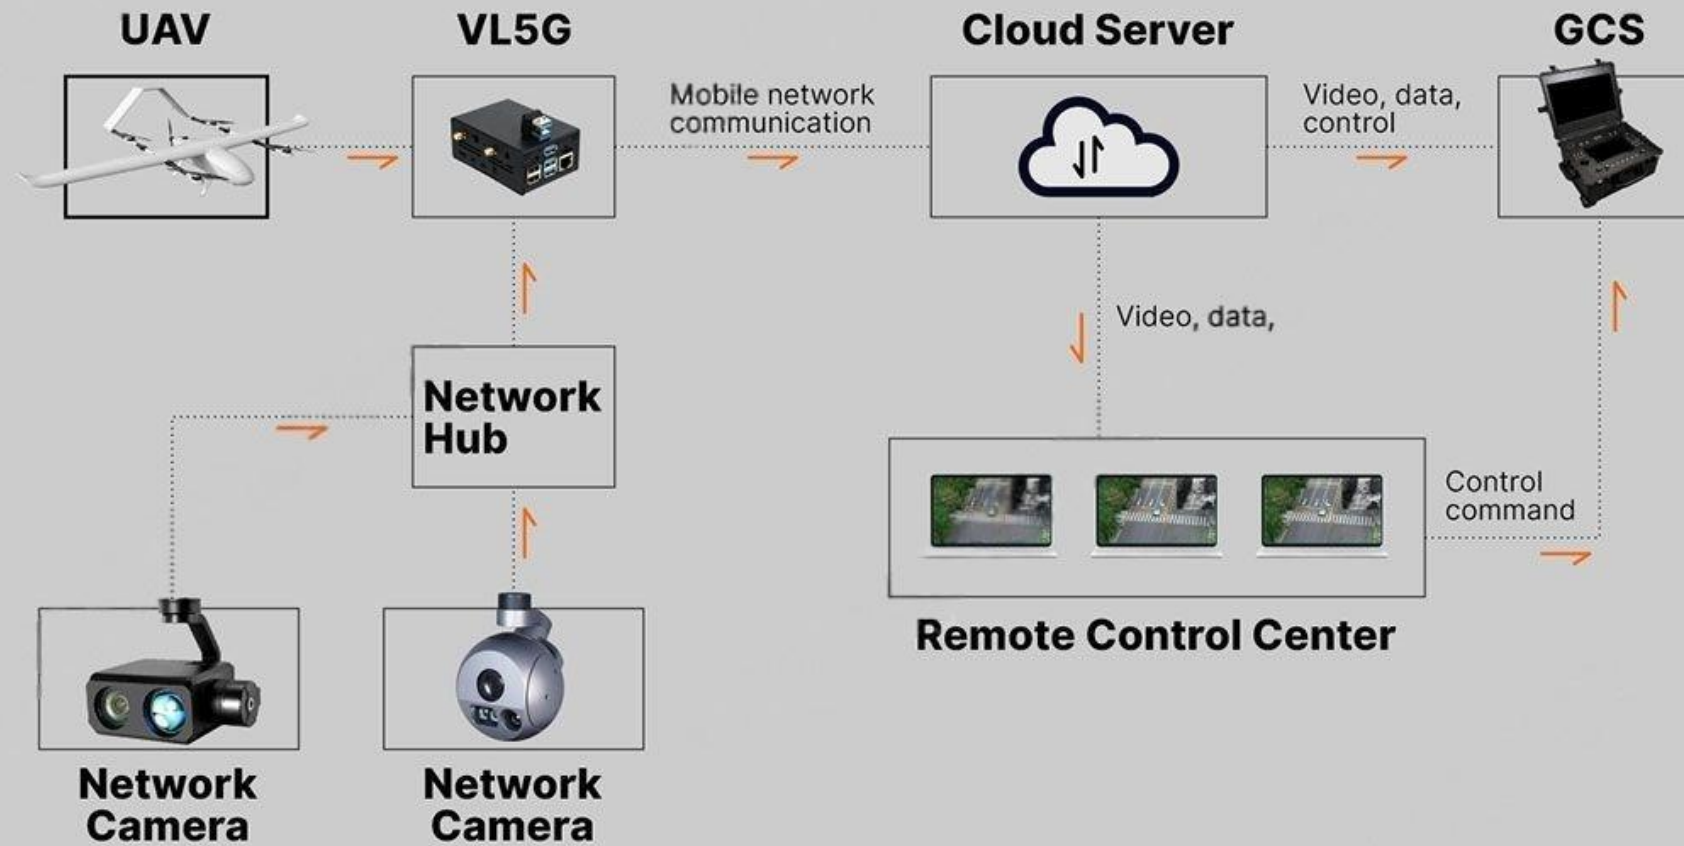

Easy to Set-up, Plug and Play

Support secondary development for expansion functions

VL5G

Applications

The low-latency video transmission by 5G mobile network enables users to globally monitor various scenarios of the drone at the command center or ground control station real-time, and control the drone. VL5G is specialized in inspection tasks for many industrial domains such as power grids, ports, mines, etc. It is also widely applied to transportation with offsite take-off and landing as it can solve the signal disconnection problem for point-to-point communication due to blocking during landing stage.

Power Grids Inspection

Mines Inspection

Ports Surveillance

Long Distance Delivery
