10km Laser Range Finder Target GPS Coordinate Calculation

The laser rangefinder measures the distance from image center point to camera. Its measurement range is up to 10km. It is integrated with advanced location calculating algorithm to accurately analyze the GPS coordinate of the object and display the object coordinate on the screen.

Application

A30TR-1575- a cutting-edge solution for advanced surveillance and tracking needs.
Ideal for security, search and rescue, and industrial inspections, the A30TR-1575 offers
unmatched accuracy, versatility, and performance.
