Wheelbase:
4000 mm

Endurance:
4 hours
(5kg load)

Max Cruising Speed
23 m/s

Max Payload
6.5kg

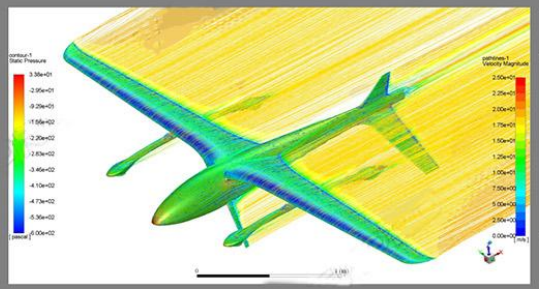
Airframe Weight
17.5kg

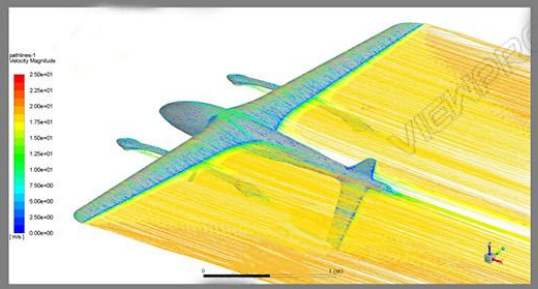
MTOW
31 kg

01

Excellent performance of endurance and payload capacity

Compared with other 30kg MTOW VTOL fixed wing drone platform, MoneyproM400 features with more excellent performance of endurance and payload capacity. Maximum payload capacity is 6.5kg and endurance reaches 4 hours

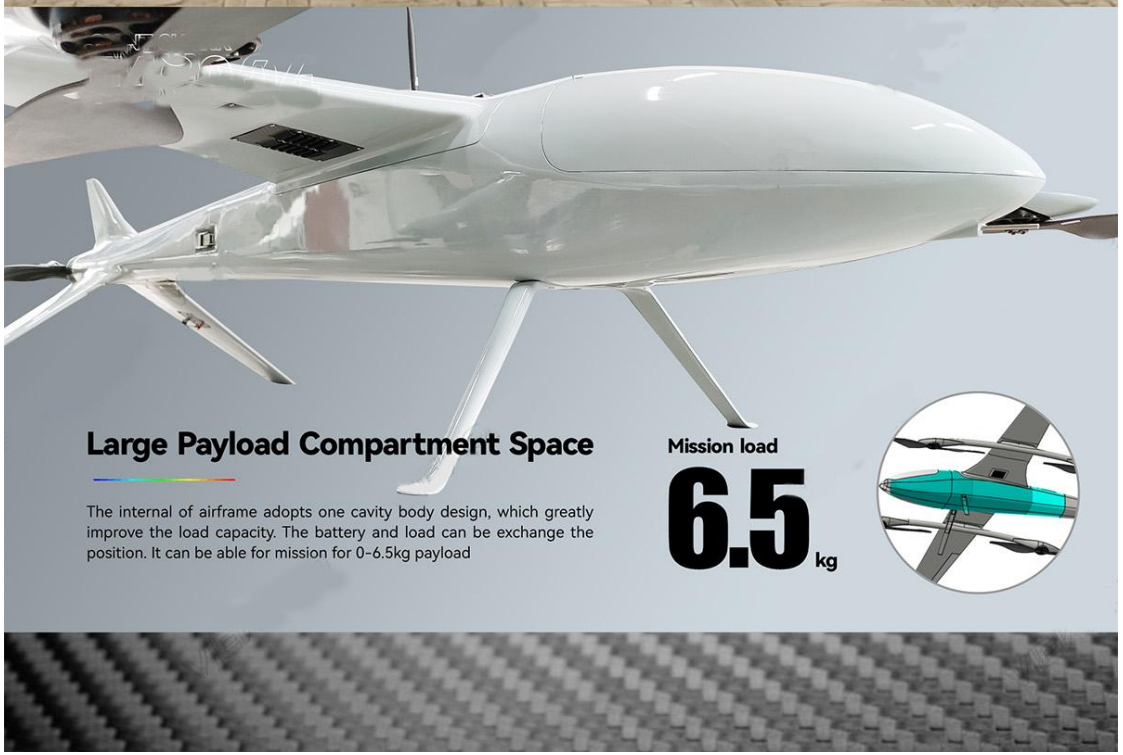




Compact layout enhance flight efficiency

16.2 Thrust-to-weight ratio

The arm of drone adopts the arch design, which perfectly combines aerodynamics in the engineering design, and minimize the airflow interference to wing.



Large Payload Compartment Space

The internal of airframe adopts one cavity body design, which greatly improve the load capacity. The battery and load can be exchange the position. It can be able for mission for 0-6.5kg payload

Mission load

6.5 kg

Empty weight of the aircraft

17.5 kg

All-carbon fiber fuselage

Made of aviation carbon fiber composite material which is feature of high strength and light weight, suitable for many application scenarios.

Supports Multiple Types of Payloads

Gimbal cameras

Mapping cameras

liDAR

Cargo box

Supports Multiple Types of Payloads

Gimbal cameras
