

THE UPGRADED AT SERIES

The upgraded AT Series are designed for fixed-wing model, VTOL UAV.
Let's see a leap in quality after well-grounded development.

Every attempt and consideration will bring a great breakthrough.

High temperature resistance arc magnets are selected for strong power.

High efficiency and stable endurance, the balance between technique and power.

Improvements are reflected in everywhere.

High Temperature

Stable

Safe

ROBUST BODY & RELEASE FREELY

The design with lateral outlet hole and internal heat dissipation structure, formed semi-box-shaped structure, increase strength and enhance heat dissipation performance.

Efficient
Cooling

MILITARY-GRADE WIRE & MORE DURABLE

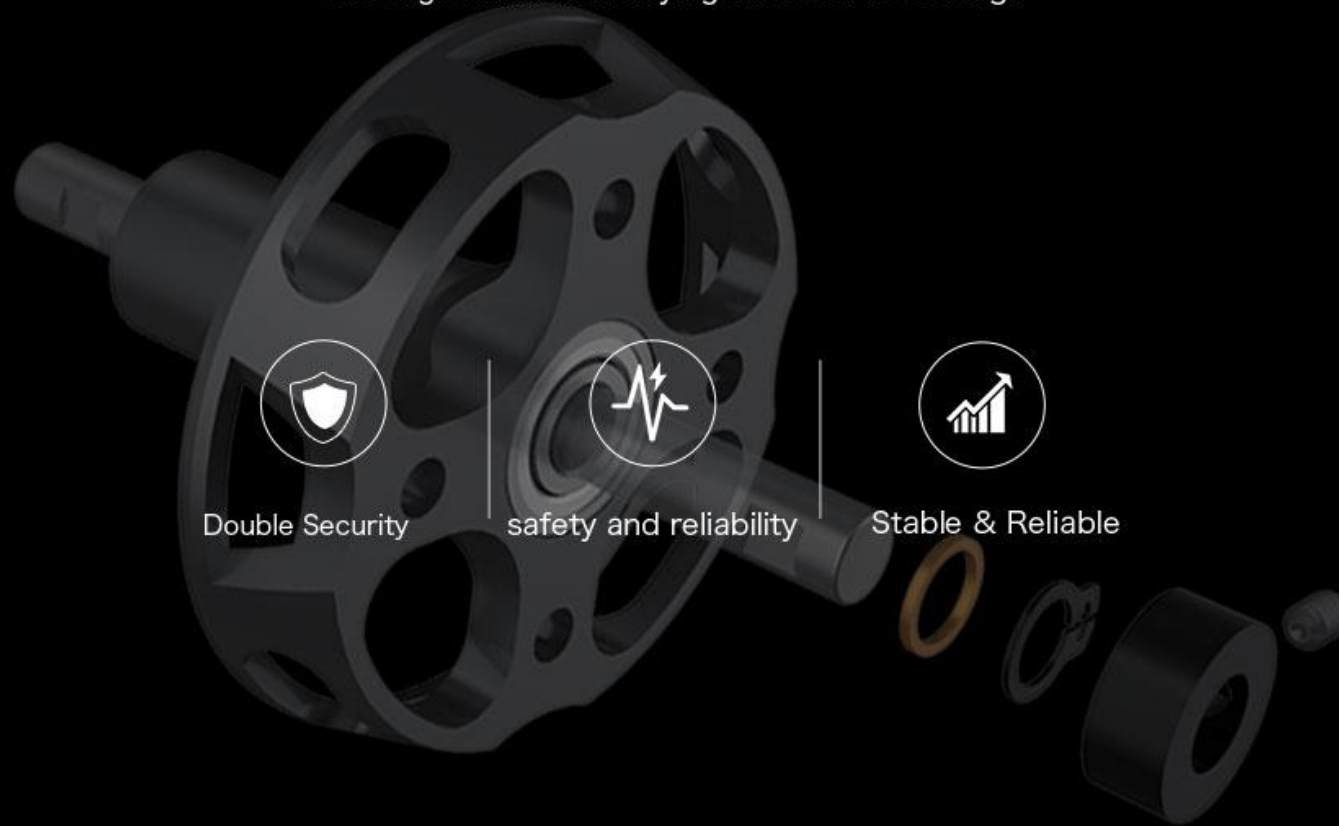

High temperature enameled wire (including special insulating layer), improves the high temperature resistance of enameled wire, also extends the working life of the motor. Hand-made winding High efficiency and stability.

ANTI-STRIPPING DESIGN SAFETY ASSURANCE

A Linear shaft design, plus the C-Clip lock shaft and shaft collar, to ensure the safety and reliability when the motor in high rotate speed.

Safe flight without worrying the rotor loosening.

PREFERRED RAW MATERIALS SUPERB WORKMANSHIP

Improvements and details are shown everywhere. Including the selected high quality materials and exquisite workmanship.

ARC MAGNET & HIGH TORQUE

Anti-high temperature arc magnets with balanced magnet gap and precise tolerance control. Optimize the motor circuit to increase motor performance by more than 5% (except 23 series) and provide high torque for the propeller.

Ordinary magnet

VS

Curved magnet

TRIPLE-BEARING SUPPORTED MORE DURABLE & FLYING LONGER

Big motor (above 28 series) features a 3-bearing
sets for greater stability, efficiency, and strength under heavy loads.

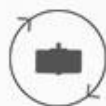

EMBOSSING DESIGN FOR SECURE MOUNTING

The adapter and cover plate of propeller adopt embossing design to provide more secure mounting.

stable

non-slip

Remark: For option

THE SECOND GENERATION OF NEW AT SERIES

will gradually release a full range of products Whether it's 3D, trainer, glider, or a larger scale plane and fixed-wing drone, we can provide the perfect power according to different sizes and weight.
