

DP-30 / DP-40

UAV Parachute Recovery System
for Multi-copter, VTOL, Helicopters

Drone Flight Safety Solutions

AUTONOMOUS DEPLOYMENT

Autonomous failure detection thanks to smart electronics and software

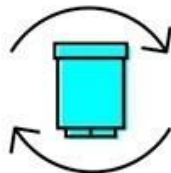

LIGHTWEIGHT

Total system weight of 650 g through intelligent engineering and advanced materials.

SIMPLE INSTALLATION

Easy to install thanks to various interfaces and smart mechanism

REUSABLE SYSTEM

Reusable within minutes after deployment through repacking or using a spare parachute

HEAVY LOAD CAPACITY

30kg/40kg

EXTREMELY FAST RESPONSE

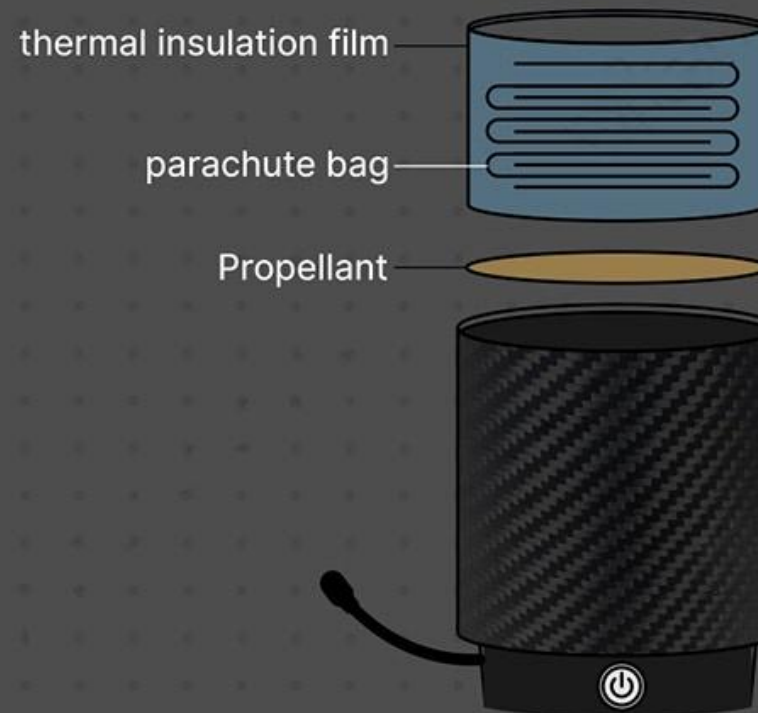

Rescue react within 0.1 second

High strength and light-weight

— Adopt compressed carbon fiber material

Thermal insulation design

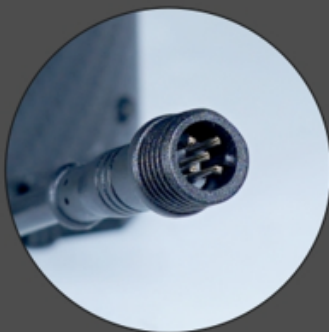

— Equipped with built-in thermal insulation film in the ejection barrel can prevent the parachute damaged from the excessive temperature in the aircraft compartment.

Safety design

Recessed power button prevents misoperation.
Adopted the aviation plug to prevent the interface from loosening and waterproof.

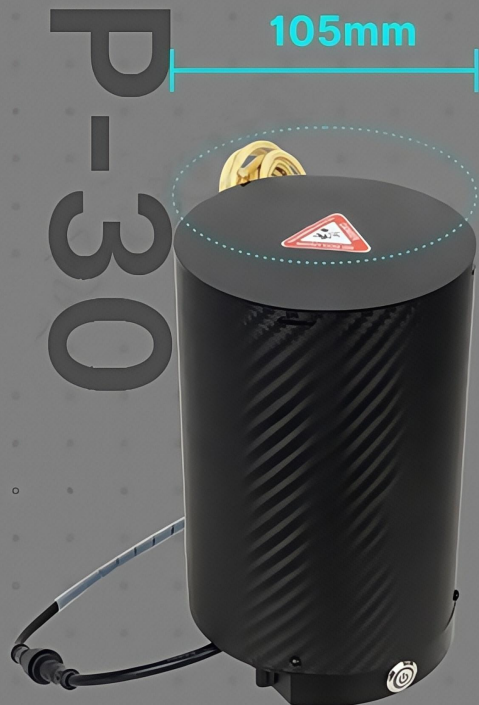

Suggested Minimum Trigger Altitude

Multi-copter 35m, VTOL/Helicopter 150m. Depends on the aircraft take-off weight

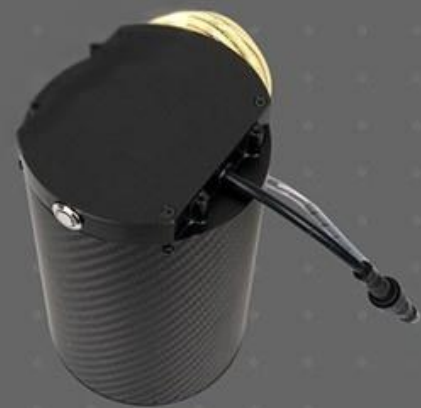

DP-30

DP-40
